Contents Volume 124

1 An age-structured model for the AIDS epidemic
J. Griffiths, D. Lowrie and J. Williams

15 A computational study of smoothing heuristics for the traveling salesman problem
S.P. Coy, B.L. Golden and E.A. Wasil

28 A hybrid genetic algorithm for the open shop scheduling problem
C.-F. Liaw

43 A genetic algorithm approach to policy design for consequence minimization
B. Rubenstein-Montano, G. Anandalingam and I. Zandi

55 A methodological framework for the validation of predictive simulations
D. Fraedrich and A. Goldberg

63 An optimization problem arising in the design of multiring systems
C. Arbib and F. Rossi

77 Some reverse location problems
J. Zhang, Z. Liu and Z. Ma

89 Deriving decision rules to locate export containers in container yards
K.H. Kim, Y.M. Park and K.-R. Ryu

102 On consistency and ranking of alternatives in fuzzy AHP
L.C. Leung and D. Cao

114 A search game when a search path is given
R. Hohzaki and K. Iida

125 Market entry, phased rollout or abandonment? A real option approach
E. Pennings and O. Lint

139 Exact and heuristic algorithms for data sets reconstruction
A. Lodi, D. Vigo and C. Zannoni

151 A simple duality proof in convex quadratic programming with a quadratic constraint, and some applications
M.Ç. Pınar

159 Context, tactics, and the examination of alternatives during strategic decision making
P.C. Nutt

187 Rating of Indian commercial banks: A DEA approach
A. Saha and T.S. Ravisankar

204 A method of optimal lattice packing of congruent oriented polygons in the plane
Y.G. Stoyan and V.N. Patsuk

217 The analytic hierarchy process in an uncertain environment: A simulation approach by Hauser and Tadikamalla (1996)
B.S. Ahn

219 OR Software
H. Thiriez

221 Editorial: Management science and operations research in China
H. Li, S. Wang and Li D Xu
224 A neural network representation of linear programming
H.-X. Li and Xu Li Da
235 Mathematical modeling of China's State-owned Enterprises' Contract System
S. Feng and Li Da Xu
243 Forecasting regional income inequality in China
F. Zheng, Li Da Xu and B. Tang
255 Modeling staffing flexibility: A case of China
N. Li and L.X. Li
267 A multiple traveling salesman problem model for hot rolling scheduling in Shanghai Baoshan Iron & Steel Complex
L. Tang, J. Liu, A. Rong and Z. Yang
283 A production rescheduling expert simulation system
H. Li, Z. Li, L.X. Li and B. Hu
294 Practices of preventive maintenance and replacement for engines: A case study
K.K. Lai, F.K.N. Leung, B. Tao and S.Y. Wang
307 Fuzzy dispatching model and genetic algorithms for railyards operations
S. He, R. Song and S.S. Chaudhry
332 A linear matrix inequality approach for robust control of systems with delayed states
Xu Li Da, C. Cheng and B. Tang
342 An adaptive control method for time-varying systems
B. Tang, Xu Li Da and W. Wang
353 Predicting duration of stay in a pediatric intensive care unit: A Markovian approach
A.S. Kapadia, W. Chan, R. Sachdeva, L.A. Moye and L.S. Jefferson
360 Multiple center capacitated arc routing problems: A tabu search algorithm using capacitated trees
A. Amberg, W. Domschke and S. Voß
377 A comparison of Lagrangean and surrogate relaxations for the maximal covering location problem
R.D. Galvão, L.G. Acosta Espejo and B. Boffey
390 Fuzzy inventory with backorder for fuzzy total demand based on interval-valued fuzzy set
J.-S. Yao and J.-S. Su
409 Optimization of printed circuit board manufacturing: Integrated modeling and algorithms
K. Altinkemer, B. Kazaz, M. Köksalan and H. Moskowitz
422 Modeling recirculating conveyors with blocking
L.C. Schmidt and J. Jackman

437 The design of robotic dairy barns using closed queueing networks
I. Halachmi, I.J.B.F. Adan, J. van der Wal, J.A.P. Heesterbeek and P. van Beek
447 Higher order approximations for the single server queue with splitting, merging and feedback
M.K. Girish and J.-Q. Hu
468 Note on cyclic sequences in the product rate variation problem
J. Bautista, R. Companys and A. Corominas

478 An interactive reference point approach for multiobjective mixed-integer programming using branch-and-bound
M.J. Alves and J. Clímaco
495 Evaluation of supply chain structures through modularization and postponement
R. Ernst and B. Kamrad
511 The discrete lot-sizing and scheduling problem: Complexity and modification for batch availability
W. Brüggemann and H. Jahnke
529 A nonparametric stochastic procedure for FMS evaluation
S. Talluri, M.M. Whiteside and S.J. Seipel
539 Efficient storage allocation for processing in backlog-controlled queueing networks using multicriteria techniques
D.I. Giokas and G.C. Pentzaropoulos
550 A note on EOQ models for deteriorating items under stock dependent selling rate
K.-J. Chung, P. Chu and S.-P. Lan
560 Properties of a sequencing problem for a mixed model assembly line with conveyor stoppages
Z. Xiaobo and K. Ohno
571 Bias and variance reduction in computer simulation studies
J.W. Crawford and T.J. Gallwey
591 The biobjective minimum cost flow problem
A. Sedeño-Noda and C. González-Martín
601 On the dynamics of stochastic diffusion of manufacturing technology
J. Liu
615 Queues with a variable number of servers
H. Li and T. Yang
629 Four-part partition games isomorphic to Silverman's game
G.A. Heuer and U. Leopold-Wildburger
641 Determination of weights of interacting criteria from a reference set
J.-L. Marichal and M. Roubens
651 Technical note on symmetric duality in multiobjective programming: Some remarks on recent results
S. Chandra and Abha
655 OR Software
H. Thiriez
657 Contents of Volume 124
